

ROBUST WIRELESS NETWORKS

SECURED RETAIL SIMPLIFIES WIRELESS DESIGN AND IMPLEMENTATION

We are quickly moving towards a world without wires as mobile devices become more prevalent in our work and social spaces. Increase in mobile device adoption brings an urgent need for ubiquitous enterprise-grade wireless connectivity that cannot be satisfied by a simple router. Wireless networks need to power business applications and be designed with the ability to distinguish corporate users from guest users. What organizations actually need is a custom-designed, carefully implemented and properly managed wireless network.

STRONG & SECURE MANAGED WIRELESS

When organizations must implement and manage a secure wireless network to support the evolving access needs, they look to partner with wireless experts like Secured Retail to ensure network security, uptime and performance. We have a clear understanding of business' wireless needs and industry's best practices, both of which we employ in to our Wireless Services to design and support robust wireless networks. We realize that security and performance of your wireless network is of utmost importance to you. We pay attention to both all while making sure your wireless network can support complex and high density applications such as voice and video over wireless.

Our Wireless Services offering enables your IT staff to offload time consuming wireless network implementation and management tasks on to us while still remaining in control of the network. Your staff will have access to a centralized cloud management system and will receive real-time notifications regarding the health of your wireless network. Our qualified engineers will ensure network uptime and promptly resolve any device or connectivity issues. This way, you can focus on streamlining internal IT resources and staffing costs while we focus on our expertise—satisfying all your wireless connectivity needs.

FEATURES

- Wireless network design tailored for your business environment
- Proactive maintenance of wireless network components
- Centralized control providing full visibility in to the wireless network
- Customized reporting features
- Qualified engineers resolving device and connectivity issues
- 8 x 5, Level 2 and Level 3 Support
- Add-on field services available for deployment

BENEFITS

- An optimized wireless network that can support all devices and business applications
- Minimize downtime and associated costs
- Meet compliance requirements
- Streamline internal IT resources

DESIGN AND SUPPORT OF YOUR WIRELESS NETWORK

Secured Retail provides Wireless Services to consumer goods retailers, restaurants, large school districts and organizations in the entertainment industry. Our experience in these markets enables us to easily understand diverse wireless computing environments.

Our methodology for delivering robust networks is simple however it takes the complexity out of wireless network management for you:

- We understand your wireless computing environment, the devices and applications that need to be supported by the network and the corresponding security needs
- We design a robust wireless network that provides secure wireless connectivity for all devices and applications
- We review all compliance initiatives with you, create a plan to meet them and position your business for success
- We proactively maintain the wireless network and provide you with customized reports to monitor the health of your network while your staff provides oversight of the process
