

DISTRIBUTED SYSTEMS MANAGEMENT

SECURED RETAIL SIMPLIFIES SYSTEM MANAGEMENT FOR DISTRIBUTED ENTERPRISES

Distributed systems are characteristic of organizations that are comprised of multiple branch offices. Branch office deployments like system OS and business applications add to the complexity of maintaining distributed systems. Among ever evolving security requirements, system deployment and management can be one of the most time-consuming responsibilities of the IT department. How do organizations maintain secure and functional systems across all branch offices without draining IT resources?

REMOTE SYSTEMS MANAGEMENT

Secured Retail's System Management Services provide you with the experience and expertise you need to deploy and manage your distributed systems. Our services enable your IT staff to focus on business specific issues while our qualified engineers take over the recurring maintenance and security tasks. In most cases we maintain your system remotely which allows you to optimize the budget and reduce costs significantly.

Our services include the configuration management of your servers and workstations so you are equipped with a platform for all your business applications. We will also manage the deployment of software and business applications your employees need. Additionally, we will provide you with secure remote access to all systems with logging and authentication capabilities so that you can deliver network access safely to a wide range of users and devices. Our engineers will handle all other tasks like the deployment and management of endpoint security and scheduled distribution of patches and updates on all endpoints to secure against known vulnerabilities. You can depend on us to prevent security issues and provide you with a functional platform to do your business.

FEATURES

- Configuration and deployment of system infrastructure and security software
- Proactive maintenance of system components
- Centralized control providing full visibility in to the system
- Customized reporting features

BENEFITS

- System perpetually kept up to date
- Optimized systems that can support business operations
- Meet compliance requirements
- Streamlined internal IT resources
- Qualified engineers promptly resolving issues

OUR APPROACH TO SYSTEMS MANAGEMENT

Secured Retail provides System Management Services to consumer goods retailers, restaurants, large school districts and organizations in the entertainment industry. We have years of experience working with information technology teams from different industry verticals on building and maintaining systems. Our experience in these markets enables us to easily understand a diverse set of business computing environments.

Our System Management Services can assist you with deploying and managing the entire system infrastructure or provide you with specialty assistance where needed. We take the following approach to support your system:

- We understand your business computing environment and the corresponding requirements
- We recommend a system infrastructure that meets the requirements and then help you build it from the ground up by configuring and deploying it for you
- We collaborate with you on defining information technology and security objectives and set up a strategic plan to meet them together, positioning your business for success
- We proactively maintain your system by remotely distributing software, business applications, patches and updates and provide your staff with customized reports so they can provide oversight of the process

Secured Retail Networks, Inc. is a consulting and solution integration firm specializing in security and network compliance. We provide security solutions for organizations in the consumer goods retail, restaurant, hospitality, education and healthcare industries. We take time to understand the security requirements of businesses and provide them with the best security solutions to support the operations of their company. Secured Retail Networks, Inc. goes beyond information security and strives to deliver information assurance so that our customers can relax and leave us to respond to their business security risks. Our portfolio consists of world-class restaurants and retailers across the country.
