

## Secured Retail Networks Recognized for Excellence in Managed IT Services

**Foothill Ranch, CA — February 26, 2019** – Secured Retail Networks, Inc. of Orange County, CA announced today that **CRN**, a brand of **The Channel Company**, has named Secured Retail Networks to its 2019 Managed Service Provider (MSP) 500 list in the **Managed Security 100** category. This annual list recognizes North American solution providers with innovative approaches to managed services. These services help customers improve operational efficiencies, maximize return on IT investments, and continuously help them navigate the complexities of IT solutions.

Managed service providers are integral to the success of businesses everywhere. They empower companies to implement and operate complex technologies while staying within their budgets and keep focus on their core business. CRN's MSP 500 list identifies the most groundbreaking managed service organizations, with advanced solutions that have endless potential for growth.

This annual list is divided into three categories: the MSP Pioneer 250, recognizing companies with business models weighted toward managed services and largely focused on the SMB market; the MSP Elite 150, recognizing large, data center-focused MSPs with a strong mix of on-premises and off-premises services; and the Managed Security 100, recognizing MSPs focused primarily on off-premises, cloud-based security services.

Secured Retail Networks' management credits the company's success to its team's ability to understand and anticipate the needs of their retail and hospitality clients, an industry that typically requires reliability and security. Over the past decade, Secured Retail Networks has built a strong reputation for quality, working with top restaurant and retail chains around the world.

"It is an honor to be named by CRN to the Managed Security 100 for 2019," said John Gapinski, founder and President of Secured Retail Networks. "Year after year, we strive to provide the best quality network security solutions for our retail, restaurant, and hospitality partners. Our focus is on quality— we engineer the best possible IT solution based on the individual business objectives of our clients. We back up our solutions with the highest level of service in our industry."

"Capable MSPs enable companies to take their cloud computing to the next level, streamline spending, effectively allocate limited resources and navigate the vast field of available technologies," said Bob Skelley, CEO of The Channel Company. "The companies on CRN's 2019 MSP 500 list stand out for their innovative services, excellence in adapting to customers' changing needs and demonstrated ability to help businesses get the most out of their IT investments."

The MSP500 list will be featured in the February 2019 issue of CRN and online at [www.CRN.com/msp500](http://www.CRN.com/msp500).
